## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12-14, 16-17, 20-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Marczynski et al.

Regarding claim 12, Marczynski et al., discloses a combined dust cap and position indicating device with features of the claimed invention including a holder in which a plurality of position indicators for indicating rotational position of the respective fasteners are mounted, and fastener covers which are located over a fastener and attachable to a corresponding position indicator so as to link movement of the fastener and the position indicator (see, for example claim 1).

Regarding claims 13-14, the position detector has similar indicator section (element 28).

Regarding claim 16, the holder is an annular disc.

Regarding claim 17, each position indicator is asymmetrical.

Regarding claim 20, the device can be a kit.

Regarding claim 21, Marczynski et al., discloses a wheel.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 15, 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marczynski et al.

Marczynski et al., does not elaborate on the nature of the fit, or the attachments.

However since fitting or attachments can be performed in variety of shapes and forms, it would have been obvious for a skilled artisan at the time of the invention to modify Marczynski et al., to provide for a snap fit, or splines attachment in order to be able to fit or remove the pieces continually. Moreover, when all the fundamental components of a claim is presented in a cited art the mere nature of each of the fitting or attachment, fails to provide for an unobvious modification, and is generally suggested by convenient or a desired intended use.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 P.M.
